## PROFILE

Senior Software Engineer with a strong front-end foundation and growing ownership across full-stack development, system architecture, identity and access management, DevOps, and industrial automation integration. Started specializing in Vue.js, TypeScript, and responsive UI design, then expanded into backend services (.NET, GraphQL), authentication (Keycloak, Entra ID, OAuth 2.0), messaging (RabbitMQ), and CI/CD (Azure DevOps). Currently works across the full delivery lifecycle for enterprise warehouse-management and industrial-automation systems, including integrations with PLCs, robots, conveyors, and scanners.

## EXPERIENCE

### Front End Developer, Momentum

Mar 2025 – Present

Agito Global · United Kingdom

- Officially a Front End Developer, but works across the full delivery lifecycle for enterprise warehouse-management and industrial-automation systems, covering front end, backend APIs, identity, infrastructure, and production support.
- Build enterprise UIs with Vue 3, TypeScript, Vuetify, Pinia, and Apollo Client for GraphQL data.
- Develop and integrate backend APIs using ASP.NET Core and Hot Chocolate GraphQL against SQL Server.
- Configure and troubleshoot authentication with Keycloak, Microsoft Entra ID, OAuth 2.0, OpenID Connect, and JWT.
- Support RabbitMQ messaging, SignalR real-time updates, Ocelot API Gateway routing, and CI/CD pipelines in Azure DevOps across dev, test, preprod, and production.
- Investigate production incidents spanning applications, databases, messaging, identity providers, and networking; support PLC, robot, conveyor, and scanner integrations.

### Front-End Developer & Team Leader

Jul 2023 – Feb 2025

Cognizant · Chennai, India · Client: Ford Motor Company

- Led a team of developers delivering an eCommerce platform for non-factory-fitted Ford accessories, following best-practice coding and design patterns.
- Integrated Angular, jQuery, and React into a unified front-end platform, ensuring performance and optimization across modules.
- Built a standalone Next.js accessories website with responsive design, integrated with the main vehicle-purchase platform.
- Owned code reviews and deployment processes, keeping post-launch issues to a minimum.

## SKILLS

### Front End

Vue.js, React, Next.js, Angular, TypeScript, JavaScript, jQuery, Vuetify, Pinia, Vite, Apollo Client, GraphQL, SignalR

### Backend

C#, .NET, ASP.NET Core, Hot Chocolate GraphQL, Entity Framework Core, REST APIs, Salesforce APEX

### Identity & Security

Keycloak, Microsoft Entra ID, OAuth 2.0, OpenID Connect, JWT, PKCE, RBAC

### Data & Messaging

Microsoft SQL Server, RabbitMQ, Elasticsearch, Kibana, Serilog

### DevOps & Infra

Azure DevOps, CI/CD, Git, PowerShell, IIS, Nginx, Ocelot Gateway, SonarCloud

### Industrial Automation

PLC & robot integration, conveyors, barcode scanners, warehouse control/management systems

## EDUCATION

### MCA: Master of Computer Applications

Madras University · 2018 – 2021

### B.Sc. Mathematics

Madras Christian College · 2015 – 2018

### HSC

SSRM School · 2015

### SSLC

SVVM School · 2013

## AWARDS

### Bronze Award: Sypher Project

Cognizant

### Spot Award: Outstanding Performance

Infosys

### Gold Medal: Best Outgoing Student

Madras Christian College

**Front-End Developer, Sypher**

Oct 2021 – Jun 2023

**First Place: Paper Presentation**

Madras Christian College

**Cognizant** · Chennai, India · Client: AbbVie

- Built reusable UI components with React JS and Vue.js, consuming Salesforce APEX data and rendering it with Chart.js.
- Optimized components for fast load times and responsive interfaces, improving data-visualization efficiency by ~20%.
- Participated in agile ceremonies and daily scrums to keep delivery on schedule.

**Technical Operations Associate**

May 2021 – Oct 2021

**Infosys** · Chennai, India · Client: Mercedes-Benz (Daimler)

- Built the Mercedes-Benz (Daimler) channel page on the Infosys Lex internal learning platform using HTML5, CSS, and Bootstrap 4.

**Senior Executive**

Jan 2020 – May 2020

**Infosys** · Chennai, India · Client: Boston Private Bank

- Developed React JS components for a centralized inventory dashboard, improving data-consolidation efficiency by ~30%.

**Executive**

Sep 2018 – Dec 2019

**Infosys** · Chennai, India · Client: Boston Private Bank

- Built UI components with React JS, TypeScript, HTML5, SCSS, and Bootstrap 4 for the inventory application.

**SELECTED PROJECTS**

**Ford Motor Company: Accessories eCommerce**

React JS · Next.js · Angular · jQuery · AEM

eCommerce platform for non-factory-fitted Ford accessories, integrating multiple front-end frameworks into one platform, plus a standalone responsive Next.js site tied into the main purchase flow.

5 members · Chennai

**AbbVie: Sypher**

React JS · Vue.js · Salesforce APEX · Chart.js

Data visualization application for tracking franchise and product performance metrics, built on a Salesforce APEX backend with reusable React/Vue components.

4 members · Chennai

**Boston Private Bank, an SVB Company**

React JS · TypeScript · PowerShell/PowerCLI

Inventory dashboard integrating on-prem data-center and Azure cloud infrastructure data, refreshed twice daily.

3 members · Chennai

**Infosys Lex: Mercedes-Benz (Daimler) Learning Channel**

HTML5 · CSS · Bootstrap 4

Dedicated learning channel page on Infosys Lex, an internal training platform hosting courses across multiple client channels.

2 members · Chennai

**E-Kart**

MS IIS · HTML5 · CSS · Bootstrap 4

E-commerce training application where sellers list products and customers add them to a cart and place orders.

6 members · Chennai
